LINCOLN

INFO: PBSUCCESS, Headquarters

KUGOWN  
Glass Etching Kit

1. We are forwarding to you herewith a sample glass etching kit which we received from Headquarters in reply to your GUAT 406. We are attaching instructions for your use, both in the original English and in a Spanish translation.

2. We have requested Headquarters to send fifty (50) such kits and we shall forward them to you as speedily as possible.

3. When issuing these kits, instruct all recipients that the people whose windows, windshields or other englassed properties are permanently defaced in this manner are likely to become very angry at the perpetrators. We therefore urge you strongly to see to it that this is used only against objects belonging to people who are on the enemy side, especially against communist and Front organizations, houses and vehicles of communist leaders and supporters, probably also against government agencies and government officials of unquestionable loyalty to the ARBENZ regime.

4. Warn your people also against possible law suits for damages as well as criminal prosecution. Whenever possible the person using this equipment should be accompanied by one or two others who will guard against getting caught by surprise and who will facilitate his get-away in an emergency.
